

Cable wrap with grommet that is convenient for wiring walls and racks

RIP-TIE releases "CinchStrap-EG"

-Strap with buckle firmly supports and fixes the cable-

Rip-Tie, Inc. (USA Headquarter: San Leandro, CA, Japan Office: Koto-ku, Tokyo)

We have released "Cinch Strap-EG" with grommet, which is convenient for wiring walls and racks.

【URL】 <https://riptide.co.jp/category/item/product-heavy/cinch-strap/>

【Product Features】

1. With eyelet brass fittings with a diameter of about 7 mm at the top. You can use screws to fasten the strap to a wall, rack, etc...

2. By pulling the strap through the buckle, the cable is firmly fixed.

Since the buckle is made of nylon, it is safe even in electrical products and magnetic environments.

3. Reliable quality and excellent durability. The main material is

Velcro® hook-and-loop fastener that has passed 10,000+ release cycle test.

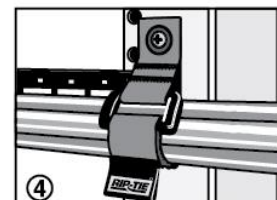

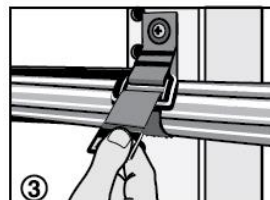

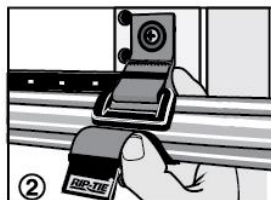

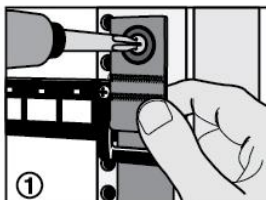

【How invented】

As a product for efficient wiring inside the relay vehicle, "CinchStrap-EG" with screw hole(s) - brass grommet for fixing to walls and racks has been developed.

It boasts high durability that can be used for a long time and can be used for heavy cable wiring, and can be easily attached and detached without damaging the cable.

【How to use】

- ① Pass the screw through the grommet hole and fix it so that the buckle faces downward.
- ② Pass the cable between the buckle and the loop.
- ③ Pass the pull tab through the hole in the buckle and pull it.
- ④ Press the hook to the loop and close it to fix.

【Where and when can be used】

Ideal for wiring in relay cars, computer rooms, and racks.

With a non-metallic nylon buckle, it can be used with confidence even in electrical products and magnetic environments.

In addition, the pull tab (tag part) can be customized to print the company name and logo.
